Thursday 17 August: Level 3* results

*A-Levels, Level 3 BTECs & vocational and technical qualifications, e.g. T-Levels.

On results day, ensure you have:

- Your UCAS Track (UCAS ID) login details.
- Contact numbers for the Admissions team at your chosen university.
- Sufficient credit/ minutes allowance on your phone for any calls you may need to make.
 - Bear in mind that the phones at universities, colleges and schools are likely to be very busy.

If you got the grades you need for your chosen higher education course and establishment:

- You simply need to wait for your confirmed offer to contact you with information on your next steps;

Or

- If you were waiting for grades for a (higher) apprenticeship programme, you will need to contact the employer/ scheme manager to update them on your grades to confirm your offer of employment/ training.

If you did not get the grades for your chosen higher education course and establishment:

- You should check [UCAS Track](#) to see if your offer at your preferred higher education establishment still stands; please note this may be *pending* as some universities may take longer to decide if they can accept you and could request a breakdown of your results, for example.
- If your first choice is subsequently not available, you may be eligible for your insurance offer and you should use [UCAS Track](#) to view these details.
- If neither your first choice nor insurance offer are open to you (or if you did not pick an insurance choice), you will be eligible for [Clearing](#), a process that allows you to search for and potentially access other course options at your preferred university, or apply for remaining places at another university. Please see the UCAS website for details on Clearing Plus – a tool that signposts you directly to relevant universities whose entry requirements match your results.

If you exceeded your expected grades you are eligible for [Clearing](#). If you are holding a firm unconditional offer and want to change your university choice, you should click the 'decline your place' button in your application. Please make sure you have spoken to the university concerned and / or your school Careers Adviser before going ahead with this step.

If you are seeking apprenticeship or job opportunities please see page 8 for some useful websites.

If you are unhappy with your grades, [find out how you can appeal](#).

Please note: when considering your next steps, it is highly advisable to obtain advice and guidance from a qualified careers professional in your school or college in addition to teaching staff.

Qualified careers professionals are also available via the [National Careers Service](#), [Prospects](#) or [UCAS](#)

Thursday 24 August: Level 2* results

*GCSEs, Functional Skills (Levels 1 & 2), Level 2 BTECs and vocational subjects.

How schools issue GCSE results vary. Contact yours and find out how you will receive your results. **Ensure you store your results safely; you will need them when you go to your new place of learning or working.**

If you *got the grades* you needed and have applied to sixth form or college

If you have an offer from a sixth form or college, you should have received an email with details of your enrolment date and time. If you cannot locate this, double check with the school or college.

What you need to enrol:

- Your examination results.
- Proof of identification, e.g. passport/ birth certificate/ Home Office documents etc.
- Proof of your National Insurance number.
- Any signatures required from parents/ carers.
- Any details for any additional support needs/ special educational needs you have e.g. your EHCP.

If the sixth form, you've applied to asks you to sit their own test.

School sixth forms and colleges should take into account the grades that you have achieved, but they may opt to set their own entry test. Find out how the school or college will support you in order to take the test.

If you have not applied to a sixth form or college see page 5.

If you did not get the grades you needed you will need to do one of the following:

1. [Get advice](#) from your chosen sixth form or college to find out what (other) programmes you may be eligible for.

Make sure your course choice fits in with *your* career plans and goals. It is essential that you pick the best courses that help you achieve this rather than take a place on a course just for the sake of it. This might mean that you need to rethink your plans.

2. [Research your options \(again\)](#). Some of the websites listed below may help you:
 - a. [My Choices at 16+ guide](#) for course options in schools / colleges / with Training Providers.
 - b. [London Colleges](#) for London-wide college course information.
 - c. [National Careers Service](#) & the [Government Apprenticeship website](#) for more information on courses and Apprenticeships.

It is essential that you consider *all* of your options. Speak to your school/ college Careers Adviser to help you make sense of your options and decide on the best one for you.

You can also call the National Careers Service Helpline on: 0800 100 900.

If you have not applied to a sixth form or a college

3. Check the [London Colleges website](#) to see which colleges are enrolling now.

4. [Call the school or college of your choice ASAP](#). Many sixth forms and colleges have Open Enrolment from a specific date, so you will need to be proactive and work quickly to find an alternative option.

Colleges are more likely to have spaces as they offer a wider range of courses. However, as some courses are heavily subscribed you should contact them directly. Check school and college websites about open enrolment days for students without prior applications.

5. [Consider an apprenticeship](#) which enables you to gain a meaningful qualification and learn and earn at the same time. Find out more about Apprenticeship in the [My Choices at 16+ guide](#) or on the [Government website](#).

If you didn't get the grades to start an Apprenticeship, you could opt for a **Study Programme** – a course of study, which gives you the opportunity to develop your Maths and English skills (also known as Functional skills) if you did not achieve a grade 4, and also prepare you for work. Please contact the Post 16 Participation & NEET team for more information.

[If you are unhappy with your grades](#)

find out how you can appeal or you consider resitting your GCSEs.

[If you are considering resitting your GCSEs](#)

You can contact one of the establishments below. A couple of things for you to be aware of:

- Check which subjects the school or college offers in terms of resits – in many cases, this is Maths & English only.
- Some schools may give you the opportunity to re-sit your GCSEs alongside other subjects.
- Some of the establishments have fees for their resits, be sure to clarify this first.

Croydon Adult Learning And Training (CALAT)
Cambridge Tutors College
Croydon Metropolitan College
My Choices at 16+ guide (see GCSE course listing page)
Lambeth College
Sutton College

This is not an exhaustive list.

[If you need a fresh start to learning](#), foundation study programmes in Maths and English or ESOL with a vocational area, e.g. construction may work for you. Check the My Choices at 16+ guide for a list of providers offering these courses locally.
